

Emergency Monitoring System for Spa

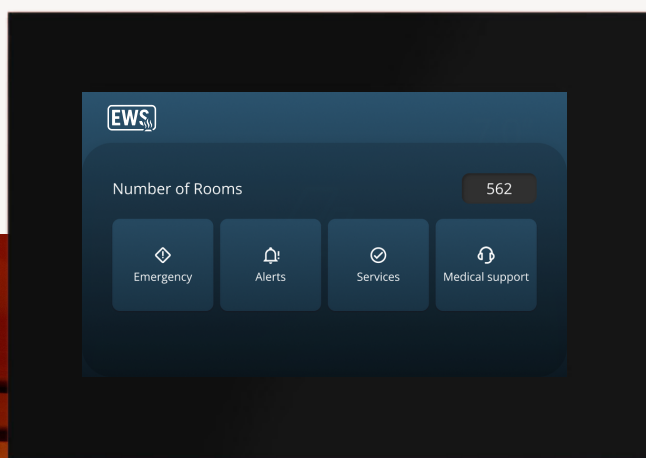

Empowering Spa Operations with Real-Time Monitoring

Safety, Control, and
Comfort at Your
Fingertips

Overview

The Emergency Monitoring System is a cutting-edge solution designed specifically for spa environments to enhance safety, control, and client assistance. Featuring a sleek 7-inch touchscreen interface, this system provides operators with real-time monitoring and control of up to 8 rooms, including saunas, steam rooms, and hammams. The system integrates advanced emergency alerts and operational controls to ensure smooth functioning and immediate response to client needs or safety concerns.

Technical Specifications

- **Display:** 7-inch high-resolution capacitive touchscreen.
- **Room Capacity:** Up to 8 rooms.
- **Connectivity:** Wired or wireless integration with room sensors and emergency buttons.
- **Power Supply:** Standard AC power with battery backup for emergencies.
- **Alert Types:** Visual, audible .
- **Mounting Options:** Wall-mounted or desk-mounted for easy access.
- **Customization:** Supports personalized floor layouts and room names.

Emergency Alert System

- Alerts are visually displayed on the floor layout map as blinking or colored indicators to highlight the affected room. Alarm notifications
- are accompanied by audible warnings for immediate action.

Touchscreen Interface

- A 7-inch, high-resolution touchscreen for intuitive navigation.
- User-friendly interface with clear icons and labels for easy operation by staff.

Real-Time Room Monitoring

- Displays the floor layout of the spa, showing the precise location of all monitored rooms.
- Real-time updates on room status.

Client Emergency Assistance

- Clients can trigger emergency alerts using panic buttons installed inside the rooms.
- The system notifies operators instantly, enabling them to respond promptly to ensure client safety.
- Displays room-specific information, such as the name and location of the room, along with suggested actions.

Customizable Settings

- Supports up to 8 rooms, with options to rename or reassign rooms (e.g., Sauna 1, Hammam 2, etc.).
- Adjustable parameters for different room types to suit unique operational requirements.

System Backup and Logs

- Logs all emergency alerts, responses, and room control activities for record-keeping and analysis.
- Equipped with a battery backup to ensure functionality during power outages.

5 Years LTA
